

WEEKLY BULLETIN

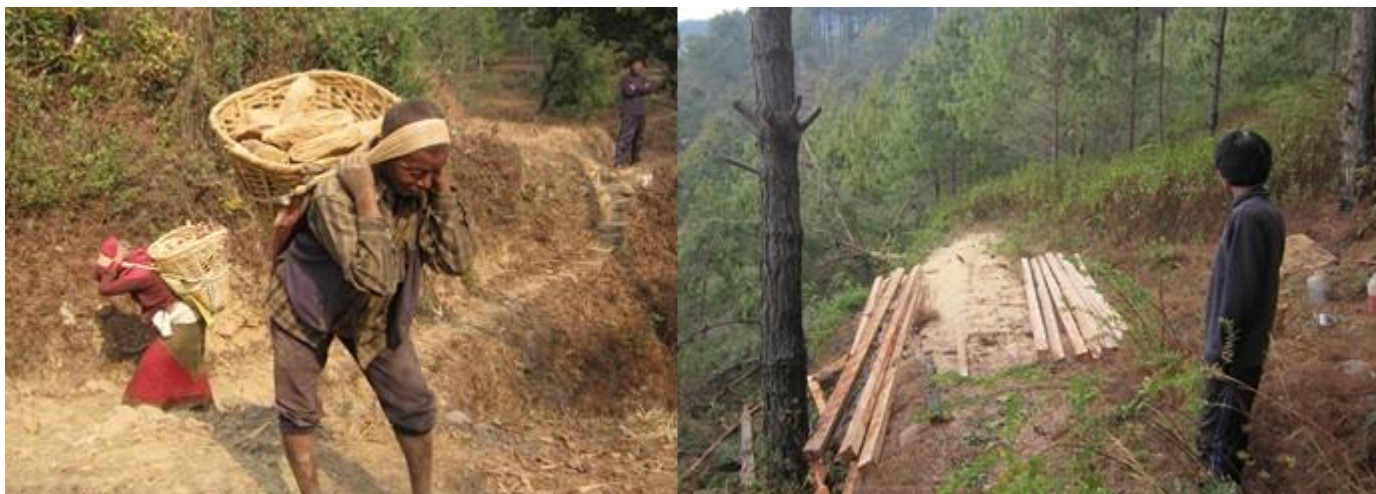

12 March 2018

Sharada Danuwar, a mason from Kavre, shares her inspiring story on [Sajha Sawal \(English subtitles available\)](#). Sharada has overcome discrimination and persisted in her efforts to become a successful mason and has now built over 100 houses and is working towards becoming a contractor. Partners are encouraged to use the clip as a motivational story during training for masons or for other events / orientations.

Rani Lama, from Kavre, attended the 'Women in Reconstruction' event that took place on 9 March and shared her experience managing the reconstruction of her mother's house. Rani shared the challenges she faced in hiring skilled masons to work on the reconstruction; eventually she hired masons from Surkhet, in Far West Nepal, to carry out the work. At first, people in Rani's village did not believe in her management skills and did not expect that she could get her mother's house rebuilt. However, in less than one month Rani has managed to get the construction to ring beam level and expects to complete the roof soon. Rani has also contributed to the whole village by working with the Gorkha Welfare Society to get support for construction and repair of the water supply network in the village.

Stones being carried to Rani's mother's house (L) and preparation of the timber for Rani's mother's house in the local forest (R).

Rani's mother's house under construction.

Highlights

- Sharing materials from the [‘Women in Reconstruction’ event, 9 March](#)
- Summary of NRA Vulnerability Policy Consultation Meeting with Partners, 9 March
- Request from NRA Technical Committee Meeting for partner feedback on the [draft evaluation guideline](#) for light timber / steel frame structures (mainly found in Sindhuli and Makwanpur) – please share feedback with Kuber Bogati, HRRP National Technical Coordination Officer, techofficer1.national@hrrpnepal.org, by 20 March
- Update on reconstruction in Tanahun, one of the 17 moderately affected districts
- [GoN Work Division Regulation 2074 \(Nepali\)](#): this regulation sets out the work division amongst the GoN ministries (there are now 18, reduced from 31)
- [Lamjung Field Visit Report, HRRP, 19-24 February](#)
- [HRRP Housing Reconstruction Progress Maps](#): based on MoUD CLPIU inspection data as of 5 March
- [Nepal Picture Library, Call for Applications, The Feminist Memory Project, Research Fellowships](#)

UPDATES & REQUESTS

National

MoFALD CLPIU Enrolment Data, as of 9 March (Nepali and Unofficial English Translation):

	23 February	2 March	9 March
Total No. Eligible HHs	767,705	767,705	767,705
HHs Enrolled	701,350	693,602	695,116
HHs Received 1 st Tranche	691,255	682,957	684,227
HHs Applied for 2 nd Tranche	270,839	290,302	290,302
HHs Received 2 nd Tranche	219,971	228,869	238,482
HHs Applied for 3 rd Tranche	70,820	75,480	76,020
HHs Received 3 rd Tranche	51,272	54,151	56,747

‘Women in Reconstruction’ Event, 9 March: huge thanks to all the presenters and everyone who attended the event on Friday. The presentation slides are now available for download [here](#), along with the stories of [Chenga Tamang](#), [Doma Sherpa](#), [Kanchi Rana Magar](#), [Lakpa Yangjen](#), [Maiya Shahi](#), [Mithu Nepali](#), and [Sita Biswakarma](#), shared at the event. The Inter-Agency Common Feedback Project reports and data are available on their website - <http://www.cfp.org.np/>. Each week we share a Milijuli Nepali episode in this bulletin, see ‘Partner Products’ section below, and all episodes can be found on SoundCloud here <https://soundcloud.com/milijulinepali>. The Feminist Dalit Organisation report presented during the event is available [here](#). More details on the Helvetas Employment Fund Skills for Reconstruction programme are available on their website https://nepal.helvetas.org/en/pro/employment_fund.cfm. Please contact Siobhan Kennedy, HRRP Recovery Advisor, siobhan@hrrpnepal.org, if you have any questions or would like to share feedback on the event and / or provide suggestions for actions based on the evidence presented.

NRA Vulnerability Policy Consultation Meeting with Partners, 9 March: the meeting was chaired by Dr. Chandra Shrestha (NRA Executive Committee member and assigned lead on vulnerability), Yam Lal Bhusal (NRA Spokesperson), and Rajauman Mandar (NRA Joint Secretary), and the NRA GESI advisor, and attended by DFID, IFRC, CARE, CRS, USAID, UNOPs, Build Change, Practical Action. The objective of the meeting was to explain the recently approved NRA procedures related to the identification of vulnerable earthquake affected beneficiaries, 2074 (Nepali, [Unofficial English Translation](#)), and to discuss how partners will contribute to this. Based on this policy the NRA have identified 20,206 vulnerable households in the 14 districts and 3,573 vulnerable households in the 17 districts. Based on the procedures, the type of support that can be provided to these households is up to 50,000 NPRs (in addition to the 300,000 NPRs housing reconstruction grant) in cash or in kind. Socio-technical assistance should also be provided in addition to the cash / in kind support. The NRA will share the list of vulnerable families with Partner Organisations (POs) that commit to supporting these households (within the relevant criteria). POs will not be prevented from working with other disadvantaged / marginalised families within their working areas, but are encouraged to ensure that those within the NRA vulnerability criteria are supported within their areas of operation. POs are requested to submit proposals for vulnerable support to the NRA for verification / approval.

NRA Technical Committee Meeting, 9 March: the meeting was chaired by Dr. Hariram Parajuli, NRA Executive Committee Member, and included representatives from NRA, DUDBC, MoUD CLPIU, MoUD, IOE/TU, JICA, NSET, World Bank, and HRRP. The committee reviewed the progress by the technical working group on light timber and steel framed buildings and agreed to disseminate the [draft evaluation guideline](#) to partners get feedback on the designs and solutions proposed. Please share feedback with Kuber Bogati, HRRP National Technical Coordination Officer, techofficer1.national@hrrpnepal.org, by 20 March. Feedback will also be gathered from DLPIU and PO field engineers especially from Sindhuli and Makwanpur to verify the practicality of the guideline, and to check if it adequately addresses field problems. The committee suggested that the technical working group should prepare a

simple design excel sheet, in addition to the manual, which could be used by the field engineers to address individual buildings of similar typology.

Baliyo Ghar, Training for Instructors, 11-16 March: One more edition of Training for Instructors (TFI) course has begun under Baliyo Ghar Program, a technical assistance program supported by USAID and implemented by NSET. Altogether, 28 participants; Engineers and Social Development Officers engaged in post-earthquake activities are joining the 5-day course. This is the 3rd series of TFI under BaliyoGhar Program and 2 more such trainings will be conducted during the life of programme. TFI is a rigorous instructor development course. The purpose of the course is to provide the participants with training methodology and specific personal skills that will assist them in improving their knowledge and skills to develop, present, and manage effective training programs.

PERP (Post Earthquake Reconstruction Planning), Central Dissemination Workshop, 7 March: the event was organised by MoFALD CLPIU with support from DFID and ICF international, and was chaired by NRA Executive Committee member, Dr. Chandra Shrestha, and attended by various line agencies, donors, newly elected representatives, and POs. PERP was implemented in 26 rural municipalities across Rasuwa, Nuwakot and Dhading. The objectives of PERP is to provide technical assistance for the preparation for practical 5 year strategic reconstruction and recovery plans with budgets for each municipality. The approach and methodology, timeline, strategic plan, challenges, and way forward from PERP were presented. Lessons learned across six areas (design, PERP process, PERP outputs, replicability, local government restructuring, and capacity development) were also presented. Mr. Prashant Malla, IM specialist demonstrated capability of PERP platform in collecting field level data by authorized indicator and its visualization on a public web interface. More details can be found on <http://perp.softwel.com.np/>.

Districts & Municipalities

Lamjung Field Visit Report, HRRP, 19-24 February

Tanahun Update, HRRP: the HRRP team are currently in Tanahun (as part of the on-going efforts to visit the 17 moderately affected districts) and some of the major issues and challenges observed after meeting with major stakeholders (Partner Organisations, Municipalities, DLPIU engineers, DCC, MOUD-DLPIU, MoFALD-DLPIU, and NRA) are as follows:

1. Misinformation and confusion are present at all levels – field, local, and district. There is no clear and uniform understanding on reconstruction policies, guidelines and processes. Lack of coordination and communication between reconstruction related authorities as there has not been clear information of rural/municipality, NRA and DLPIUs role and responsibilities.
2. There are no partners providing support for rural housing reconstruction in the district which has left enormous gaps in socio technical assistance. There is an urgent need for the [minimum package of socio-technical assistance](#) to be implemented as households are waiting for clear information and support to start reconstruction. NRA Tanahun requested that the gaps in coverage be presented and reflected at central level so that it may help with reducing the funding gap.
3. 13,821 HHs have been listed as eligible for the GoN housing reconstruction grant and PAs have already been signed with 88% of households as there are major problems in beneficiaries' name and details verification. Agreements were signed with many male head of households but only females are present in the village to lead reconstruction. MIS has not been setup yet and no orientation was provided to staff creating a huge confusion around MIS and documentation for the inspection and tranche disbursement process. For example, the inspection engineers do not have tablets and are still waiting for inspection forms to conduct the inspections so it is impossible for second tranche distribution to move ahead in the district.
4. MoUD-DLPIU office has not been established yet and some of the inspection files were sent to Gorkha DLPIU for verification process and the files still need to come back to Tanahun MoFALD-DLPIU for tranche release process. MoUD-DLPIU Deputy Chief, Gorkha, Mrs. Sunita Shrestha, requested HRRP to explore

opportunities and capacity to support orientation and training to setup system and process in Tanahun district as new MoUD-DLPIU office in Tanahun will soon be established.

5. Most government technical staff and engineers have not been trained or oriented on process, system and technical guidelines and manuals and are therefore are not able to apply these in their work or share relevant information with households and masons.
6. There are approximately 600 houses that have been constructed but are not fully compliant and require corrections based on the Corrections and Exceptions Manual. However, as per point 5 above most government and PO engineers have not been trained on the relevant policies and guidelines. There is also a need for the District Support Engineers to analyse cases which are not within minimum requirements and building code and to feed the information back to national level for more in-depth analysis if required.
7. The municipality design approval process and cost is variable with people required to pay up to 4500 NPRs (but it is free of cost in Byas Municipality) for a load bearing design. If beneficiaries choose one of the 17 designs from the [DUDBC design catalogue volume 1](#) they do not need to pay for design approval which incentivises HHs choosing one of the 17 designs even though this is not mandatory.

Bhanu Municipality, Ward No. 2, Tanahun: Lakshman Nepali was planning to reconstruct with salvage materials i.e. stone and timber and had started putting up vertical posts (as seen in the photo). He has received the first tranche of the GoN housing reconstruction grant but he doesn't own his land, despite his family having lived on this land for three generations. Lakshman was not aware that the GoN will provide up to 200,000 NPRs to landless households for the purchase of land. The municipality office has not approved his request to construct an RCC house due to Right of Way (RoW) conflict with the Lok Marg (Highway). There are many households in this municipality who do not have land registration documentation and have similar problems to start reconstruction.

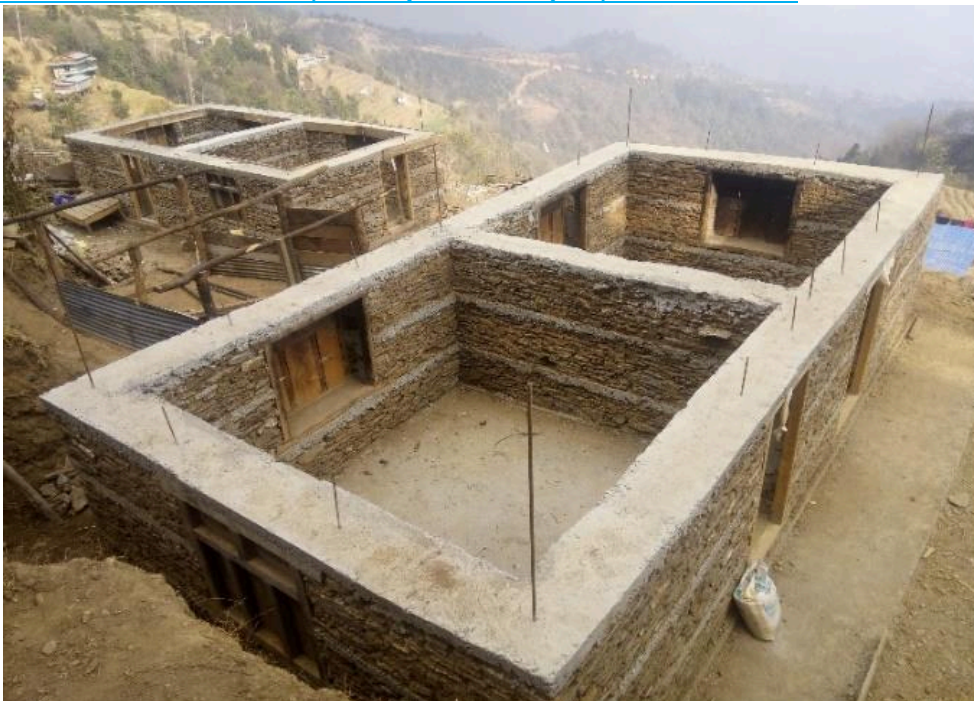

Bhanu Municipality, Ward No. 2, Tanahun: Ujeli B.K. has received the first tranche of the GoN housing reconstruction grant and does not know anything about the process to receive the second tranche of the grant. He has already reconstructed a one room house with a steel frame and flexible roof structure and the house has not yet been inspected by the government engineers.

HRRP District and Municipal Coordination Meetings, 2 – 8 March: during this period there was a district coordination meeting in Ramechhap (6 March). Municipal level meetings took place in Sailung Rural Municipality, Dolakha (5 March) and Indrawati Rural Municipality, Sindhupalchok (7 March). Some of the highlights from these meetings include:

- In Ramechhap, the reconstruction in the district is moving at a good pace but it is challenging to ensure the quality of the construction work. The NRA Chief informed that there are plans for the 7-day mason training to be provided to semi-skilled labourers in the district to fill the gap in skilled labour in the district. HELVETAS is launching a new project in the district but the working areas are yet to be finalised.
- In Sailung Rural Municipality, Dolakha, the main discussion focused on the challenges faced by local representatives in reconstruction, their role in addressing the challenges and their future works regarding reconstruction. HRRP Dolakha also provided the details of trained masons in each ward on a printed flex. This will help households to contact trained masons.
- In Indrawati Rural Municipality, Sindhupalchok, the local Government Representatives raised concerns regarding procedures for applying correction measures for truss houses as thousands of these houses have been built and have not been approved for the second tranche of the GoN housing reconstruction grant. The lack of coordination and communication between local representatives and engineers was also discussed and it was decided during the meeting that the technical field staff will submit monthly reports to the Rural Municipality office. The HRRP team will coordinate with POs to facilitate bringing inspection files from wards to the district headquarters.

HRRP District Coordination Team Dolakha, Weekly District Report, 2 – 8 Mar 2018

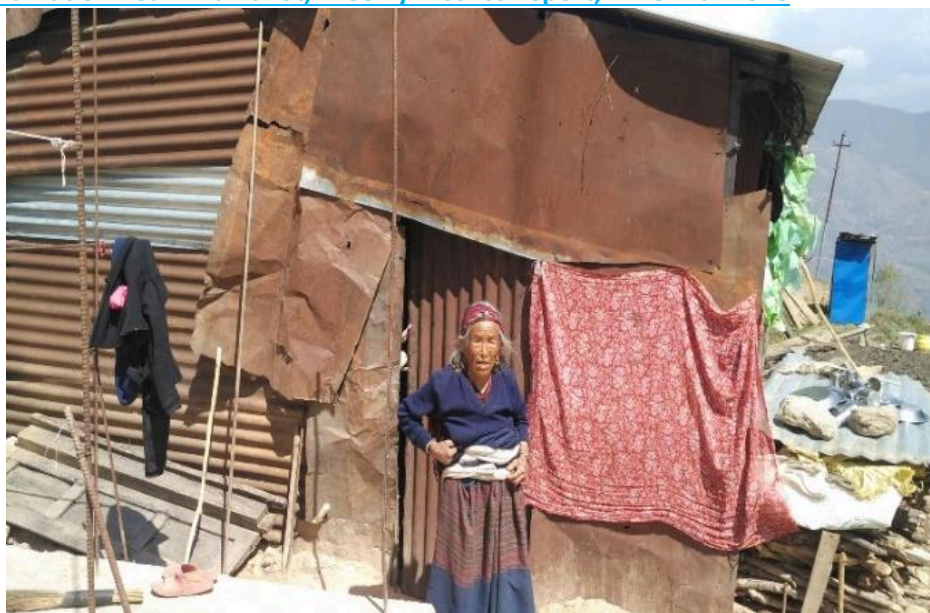

Jiri Municipality, Ward No. 4, Dolakha: a two room, one-storey, stone and mud mortar masonry home under construction. The home owner has received the first and second tranches of the GoN housing reconstruction grant.

HRRP District Coordination Team Kathmandu, Weekly District Report, 2 – 8 Mar 2018

Gimdi Ward No. 7, Bagmati Rural Municipality, Lalitpur: this house is one storey plus attic and has been construction using stone and mud mortar masonry with cement plaster and CGI roof. The house is complete and the home owner has received all three tranches of the GoN housing reconstruction grant.

HRRP District Coordination Team Nuwakot, Weekly District Report, 2 – 8 Mar 2018

Chapabot, Ward No. 5 Shivapuri Rural Municipality, Nuwakot: Mrs. Suk Maya Tamang, an 80 year old widow, is living in a temporary shelter with her five family members. She has received the first tranche of the GoN housing reconstruction grant but her partnership agreement was later transferred to her grandson due to her old age. The family have started reconstruction of a two-room house. Mrs. Tamang finds living in the temporary shelter difficult, especially in winter and monsoon season.

HRRP District Coordination Team Sindhupalchok, Weekly District Report, 2 – 8 Mar 2018

Badegau, Ward No. 5, Indrawati Rural Municipality, Sindhupalchok: a female mason/contractor is instructing the head mason during house construction. She took 50 days vocational mason training through SABAL/UCEP-N. After she received the training, she started to work as supporting mason and later became a contractor. She has already completed four houses under her supervision and five more are under construction in Badegau.

Requests for Partner Support

[Intrepid Solutions Lecture Series, Nepal Engineers' Association, every Tuesday at 5pm:](#) supported by UNOPS and Build Change, this lecture series provides an opportunity to connect with national and international experts to explore innovative solutions for improving construction practices. The second lecture will take place on Tuesday, 13 March and will be delivered by [Lizzie Blaisdell Collins](#) with a focus on 'Post-Earthquake Seismic Retrofit of Masonry Houses in Haiti in Reference to Lessons from Program Implementation'.

[Nepal Picture Library, Call for Applications, The Feminist Memory Project, Research Fellowships:](#) the project seeks to create a visual archive of women's movements in Nepal and will gather documents and oral histories from around Nepal that capture women in pivotal moments of Nepali history. The material archived will be used to create curriculum that will engage schools and colleges to encourage Nepali youth to unearth and archive their own family histories, placing their mothers, grandmothers, sisters, and aunts at the centre of their inquiries. The material will be exhibited at the third edition of Photo Kathmandu from 12 Oct – 16 Nov 2018 and published in various forms. The closing date for applications is 23 March.

[Centre for Humanitarian Data, Call for Applications, Data Fellows Programme:](#) through this programme, four Fellows will come together to design and deliver targeted projects that contribute to the overall goals of the Centre. The 2018 Fellows will focus on four areas; Data Science, Data Storytelling, Predictive Analytics, and User Experience Research. The Fellowship programme will be residential, with Fellows living and working in The Hague under the direction of the Data Fellows Programme Coordinator and with support from the entire Centre team. The closing date for applications is 31 March.

[Survey of Cash Transfer Programming capacity in Asia-Pacific region, Asia-Pacific Regional Cash Working Group and CaLP:](#) this survey is intended for all CWG members together with operations staff (Supply Chain, Finance, and ICT) of organisations that are implementing cash transfer programming in the region. It is a 10mins survey, and is open until 16 March. The findings of this survey will inform plans for which training of trainers will be offered to members in Asia and in the Pacific.

[Nepal Engineers' Association, 15th National Convention of Engineers, 21-23 March](#)

[Shelter Projects Asia-Pacific Workshop: Learning from the Past, Global Shelter Cluster Event, 17 May, Bangkok:](#) this event will bring together practitioners, academics and other relevant local stakeholders to collectively review case studies from past editions of '[Shelter Projects](#)', focusing on "what worked well" and "what didn't work well". It will also provide an opportunity to share experiences from recent shelter and settlement responses in the region, which will be reviewed and considered for inclusion in the next edition.

[Asia Shelter Forum 2018: 2nd Edition, May 18, Bangkok:](#) this is an informal forum for humanitarian shelter and settlement practitioners in the Asia-Pacific region. The forum will build on the outcomes of the Shelter Projects event on 17 May (see above) and will review some of the best practices in the region, looking at how learnings can be transferred between countries, and on defining a way forward for shelter approaches in the region. The forum will focus on three themes; preparedness activities, linking relief to recovery, and aiming at identifying localised approaches to shelter and settlements that are relevant for the Asia-Pacific context.

DOCUMENTS & PRODUCTS

Government of Nepal

[GoN Work Division Regulation 2074 \(Nepali\):](#) this regulation sets out the work division amongst the GoN ministries (there are now 18, reduced from 31). The regulatory norms and standards for I/NGOs come under the

Office of the Prime Minister and Council of Ministers (regulatory standards for I/NGOs) and the Ministry of Labour, Employment, Women, Children, and Social Society (I/NGO related policy, law, standards, regulations, and monitoring, and the Social Welfare Council). The 18 GoN ministries are as follows:

- Office of the Prime Minister and Council of Ministers
- Ministry of Agriculture, Land Management and Cooperatives
- Ministry of Culture, Tourism and Civil Aviation
- Ministry of Defense
- Ministry of Education, Science and Technology, youth and Sports
- Ministry of Water Resources and Energy
- Ministry of Federal Affairs and General Administration
- Ministry of Finance
- Ministry of Foreign Affairs
- Ministry of Forests and Environment
- Ministry of Health and Population
- Ministry of Home Affairs
- Ministry of Industry, Commerce and Supplies
- Ministry of Information and Communications and Information Technology
- Ministry of Labor, Employment, Women, Children and Social Security
- Ministry of Law, Justice and Parliamentary Affairs
- Ministry of Physical Infrastructure and Transport
- Ministry of Water Supply and Urban Development

Partners

[Milijuli Nepali, BBC Media Action, Episode 891](#): this episode comprises stories of three inspiring women from Nuwakot, Dhading, and Dolakha. The first story is of Sarmila Tamang from Dhading involved in different income generating activities so that she can pay back the loan she has taken to rebuild her house. The second story is of Bishnu Kumari Pandey from Suri in Dolakha who talks about communities working together to support the reconstruction in the village. The third story is of Anju Acharya, Vice-Chairperson from Dupcheswor Rural Municipality, Nuwakot who talked about her role to support and address the problems encounter by earthquake affected communities. She also talked about her plan to disseminate skill development training to the communities.

[Baliyo Ghar TV Programme, Episode No. 94](#): this week the programme is focused on women in reconstruction and includes the story of a female mason working in Chaapthok, Thansingh, Nuwakot. The Baliyo Ghar TV program production team spent the day with the mason documenting how she manages her household work in addition to her work in reconstruction.
