5. Use of Public Land, timber for Demo shelter.
6. CFW and Livelihood

1. Introduction

The purpose of the meeting was to understand about the Conservation Area Project since it has been alternative of Forest Department in the Northern VDC and share our earthquake recovery Programs in the Northern VDC

2. About HRRP

HRRP representative Minar and Yubraj introduced as HRRP is a coordinating platform which acts as an interface between partner organization and government bodies. Its main objective is to facilitate the reconstruction and recovery process by facilitating the communication bridge between organizations itself and with government. HRRP focuses to avoid duplication and smooth functioning of reconstruction process. For the cause, HRRP is responsible for dissemination of information from Central government to district base organization and vice versa.

How MCAP can participate in sharing of Database, trail damage report sharing and facilitate in the recovery and reconstruction. Support on the information on supply chain mechanism and other organization working in Northern VDC.

3. Sharing of CRS /SDSC activities of Shelter, Wash and livelihood

CRS representative Suraj and Tsering shared about the CRS/SDSC Shelter, Wash and livelihood Earthquake recovery programs in the northern 4 VDC. Most queries were what are the criteria for use of public land in conservation area. What are the minimum rate of the wages that has been practiced by MCAP, what are the livelihood potentials to support the community people of northern VDC. How MCAP can support in our programs in the Northern Area and avoid duplication.

4. About MCAP

According to MCAP representative Rajkumar Gurung, Manaslu Conservation Area Project (MCAP), was declared on December 28, 1998 is the second conservation area under National Trust Nature Conservation management(NTNC). Manaslu, a mountainous region in northern part of Gorkha District, has a fragile but diverse natural resource base and a rich cultural environment. With the declaration of MCA in 1998, Government of Nepal handed over the management responsibility of MCA to NTNC for 10 years. The objective was to improve the capacity of the local communities in the Manaslu area to benefit from tourism in an environmentally benign manner for sustainable development. The Trust has been implementing various field programs in the region to motivate and mobilize the local people to take the lead in managing their own resources. The capacity of the local Conservation Area Management Committees (CAMCs) is regularly enhanced through regular training and they are entrusted with the responsibility of managing the natural resources of their region in a sustainable manner. MCAP have done recovery programs in the 7 VDC till Dec 2016, and they are much still to be done. Sharing of Data can be done with HRRP and participate in the HRRP meetings as well.

5. Use of Public Land, timber for Demo shelter

In a conservation area forest land is completely restricted and it needs approval from Ministry of Forest and MCAP works closely with the legal staff from the Ministry of Forest Department. However, the land which are near residency area, with coordination with MCAP- CAMCs community can use the land for the community purpose. For the Timber, CAMCs provides receipts for the timber according to their rates per the tree. Community Participation of providing timber are also the possibilities.

6. CFW and Livelihood

MCAP has done Cash for work recovery programs in the Northern VDC, as per District wages rate unskilled is Nrs 510 and skilled rate is Nrs 700 but for the Northern VDC context till Sirdibas VDC 25% increased and above Sirdibas VDC is 50 % in increased. However, CFW can be considered as per the working hours as well. Highly Participation of community in tourism and herbs collection and plantation and marketing can improve the livelihoods of the people. A strong coordination with CAMC in the respective VDC can avoid from the duplication of the activities.
