❖ Decision 2(Sharing from PO's)

Various PO's-NSET(Baliyo ghar), DFID, PIN(Hamro ghar) , KAAA BGN(Kaadorie) , Mott macdonald (Purnima), DCA working in Dhading district in field of private housing reconstruction had presented progress of their project/programme currently running in the district. Also these organizations lesson learnt regarding vulnerable group and way forward was also discussed in meeting.

NSET(Baliyo ghar) have done survey on vulnerable beneficiaries and presented a brief presentation on field assessment result on reconstruction status of vulnerable beneficiaries. They developed questionnaire to collect need of vulnerable population which consists socio-economic status and the reason behind non-construction of house. 335 vulnerable group of beneficiary have been benefitted through NSET-Baliyo ghar program via constructing OJT model house. Now, the main work is to verify whether these 335 beneficiary listed under total 1829 vulnerable beneficiary identified by NRA in Dhading district .

PIN-Hamro ghar have been supporting vulnerable group of beneficiaries in Jwalamukhi and siddhalekh RM of dhading district. It came to know that mostly supporting vulnerable beneficiaries were out of 1829 vulnerable beneficiary identified by NRA. They said they were supporting actual vulnerable beneficiary who were unable to reconstruct their house after ward approval. Hamro ghar added they have been supporting beneficiary with single male either female in house, older citizen living alone in house with critical economic condition. Also they have provided summary of progress of their programme .Also, Chief of GMAI told PIN-Hamro ghar that it would be better if they would provide House completion certificate to benefitted beneficiary through their programme mentioning the support type in certificate. Hamro ghar programme is in their ending phase and will be conducted till March 2020 only .

KAA BGN have been supporting earthquake beneficiary by constructing beneficiary house in Dhading and Gorkha district. The house owner have to manage only aggregate and stone for foundation construction/preparation. All other materials like brick, cement, CGI sheet were covered by project. Currently they have plan to construct 66 houses in Damgadhi and 102 house in sangkosh in Nilkantha UM ward no 12 out of which 40 houses in damgadhi and 25 houses in sangkosh have been constructed.

DFID added that organizations support those beneficiary only with aggrement card(Red card)and many of the actual earthquake beneficiary were missing due to various reasons. DFID requested

GMaLI that there is possibility to include and support those beneficiary in housing reconstruction who have hadn't red card.

DCA Purnima shared that we also have to think about other beneficiary besides vulnerable as there were more beneficiary who are not able to start reconstruction .Those beneficiary also have to reconstruct the house as no one have to leave behind. DCA also shared their opine that at present context people with 60+ are considered older senior citizen and in vulnerable category only with 70+ will get additional support. It would be helpful to those if we include people with 60+ in category too. DCA also shared that besides 4 category of vulnerable, they were helping new one-poverty and food insecurity.

❖ Decision 3

PO's working for vulnerable in reconstruction sector should submit their data and progress report to DLPIU-Building and GMaLI in soft copy soon and continuing submitting monthly progress report on regular basis.

❖ Decision 4

It was decided in meeting that ,By reviewing the list of social mobilizer ,mobile masons of respective I/NGO after provided from them, it would be more effective that newly recruited social mobilizer and mobile masons by NRA would be mobilized to those place where I/NGO's SM and masons were not working so as to avoid the repetition of same work by both groups in same area.

❖ Decision 5

During field visit, many of the actual earthquake beneficiary common voice was they were not listed in reconstruction beneficiary even after their houses got fully damaged by earthquake. Decision was made regarding addressing those earthquake affected beneficiary to respective body sooner.

❖ Decision 6

Regarding vulnerable topup: Decision was made that before providing additional 50,000 topup to vulnerable beneficiary, firstly the beneficiary should commit that he/she will reconstruct their house in time and various verification should be done so that no one would be double benefitted and no one would be leave behind.
