

PROBLEMS AND CHALLENGES
ON
HOUSING RECONSTRUCTION
AT NORTHERN PART OF GORKHA DISTRICT
Tsumnurbi Gauplika
(Sridibas, Bihi, Prok, Lho, Shamagaun, Chumchet, Chekampark)

Distribution of Tranches in Nepal

Way to Tsumnubri Gaupalika

➤ Route to Tsumnubri Gaupalika from Gorkha :

❖ Bus Route: Gorkha - Arughat - Soti(1 to 2 Days)

(Note: In Rainy Seasons Buses might get disturbed)

❖ Trail Route :

- Soti - Sridibas (3 days)
- Sridibas - Bihi: 1 Day
- Bihi - Prok: 1 Day
- Prok - Lho: 1.5 Days
- Lho - Shamagaun: 1 Day
- Again from Sridibas - Chumchet: 1.5 days
- Chumchet – Chekampark: 1.5 Days

Objectives:

- To describe challenges on DUDBC designs (Volume I & II, Latest RCC designs)
- To describe about how topographical condition is affecting badly on housing reconstruction.

Problems faced:

➤ Modes of transportation of construction materials:

- ✓ Cement: 30 kg = Rs. 800(OPC) at Arughat.
At Sridibas = Rs. 1785/(30-45) kg cement(3 days Quality performance).
Plastic bags to protect from rain.
1 healthy mule carries 2 bags of cements i.e. 60 kg weight.
- ✓ Re-Bar: 12mm dia. bundle = Rs. 10,000/bundle
1 Mule carries 4 pieces of 12mm rebars
1 piece rod bending Rs. 100
Jute sack Rs 80/sack
1 mule charges Rs. 2400 for 4 pieces of rebars
Straightening of rebars as per day after delivery to site

Problems faced contd...

- ✓ Sand: Carriage of 1 pathi sand Rs. 20
Making of 1 concrete block charges Rs.30-45
- ✓ Stone: Charge of stone carrying from rivers Rs 900 per day by men and breaking of 1 m
- ✓ Aggregate: Stone breaking per bag Rs. 200
1 Bag= 30 kg
- ✓ Plain sheet: Rs. 11000- Rs. 12000; Carried only by men (Rs. 13000–Rs. 15000 for 50kg weight) to sridibas
- ✓ Timber: Salla
 $15*4*4 = \text{Rs. } 2500$ (Cutting of Timber log)
1 log = Rs.500
Carrying of Timber= Rs. 3800/4000 From near source
- ✓ Skilled manpower= Rs. 1500 - 2500

Problems faced contd...

✓ Unskilled manpower= Rs. 1000

✓ Soil = Sandy soil, Plasticity=Zero.

Note = Only in some wards the good quality of soil is found i.e. Sridibas(Sharshiu & Aanga) & Prok (Gaap).

✓ In rainy seasons transportation of materials are at high risk because of flood, landslides, soil erosion & slippery routes. (About 4 months the transportation of materials are stopped).

✓ Shamagaun & shamdo people cannot afford to put wooden band or RCC band too.

✓ To receive the tranches people have to walk 7 days for Arughat, Rastriya Baniya Bank from Tsumnubri Gaupalika. (Difficulty arises when the beneficiaries are more than 70 years old)

Applicability of DUDBC Designs

- Stone masonry with cement mortar / mud= NA
- Brick masonry with cement mortar/ mud= NA
- RCC with 16mm rebar= Impossible
- Steel Structure= NA
- New RCC 9*12 with 20 mm rebar= NA
- RAP trap = NA
- Earthbag= NA

❖ Suitable Designs:

- Dressed dry stone masonry with wooden band, RCC band, wooden cottage type houses, RCC houses with 1'x1' pillar with 12mm rods 8 in nos.(pics are available in upcoming slides).

PROK (NAMRUNG)

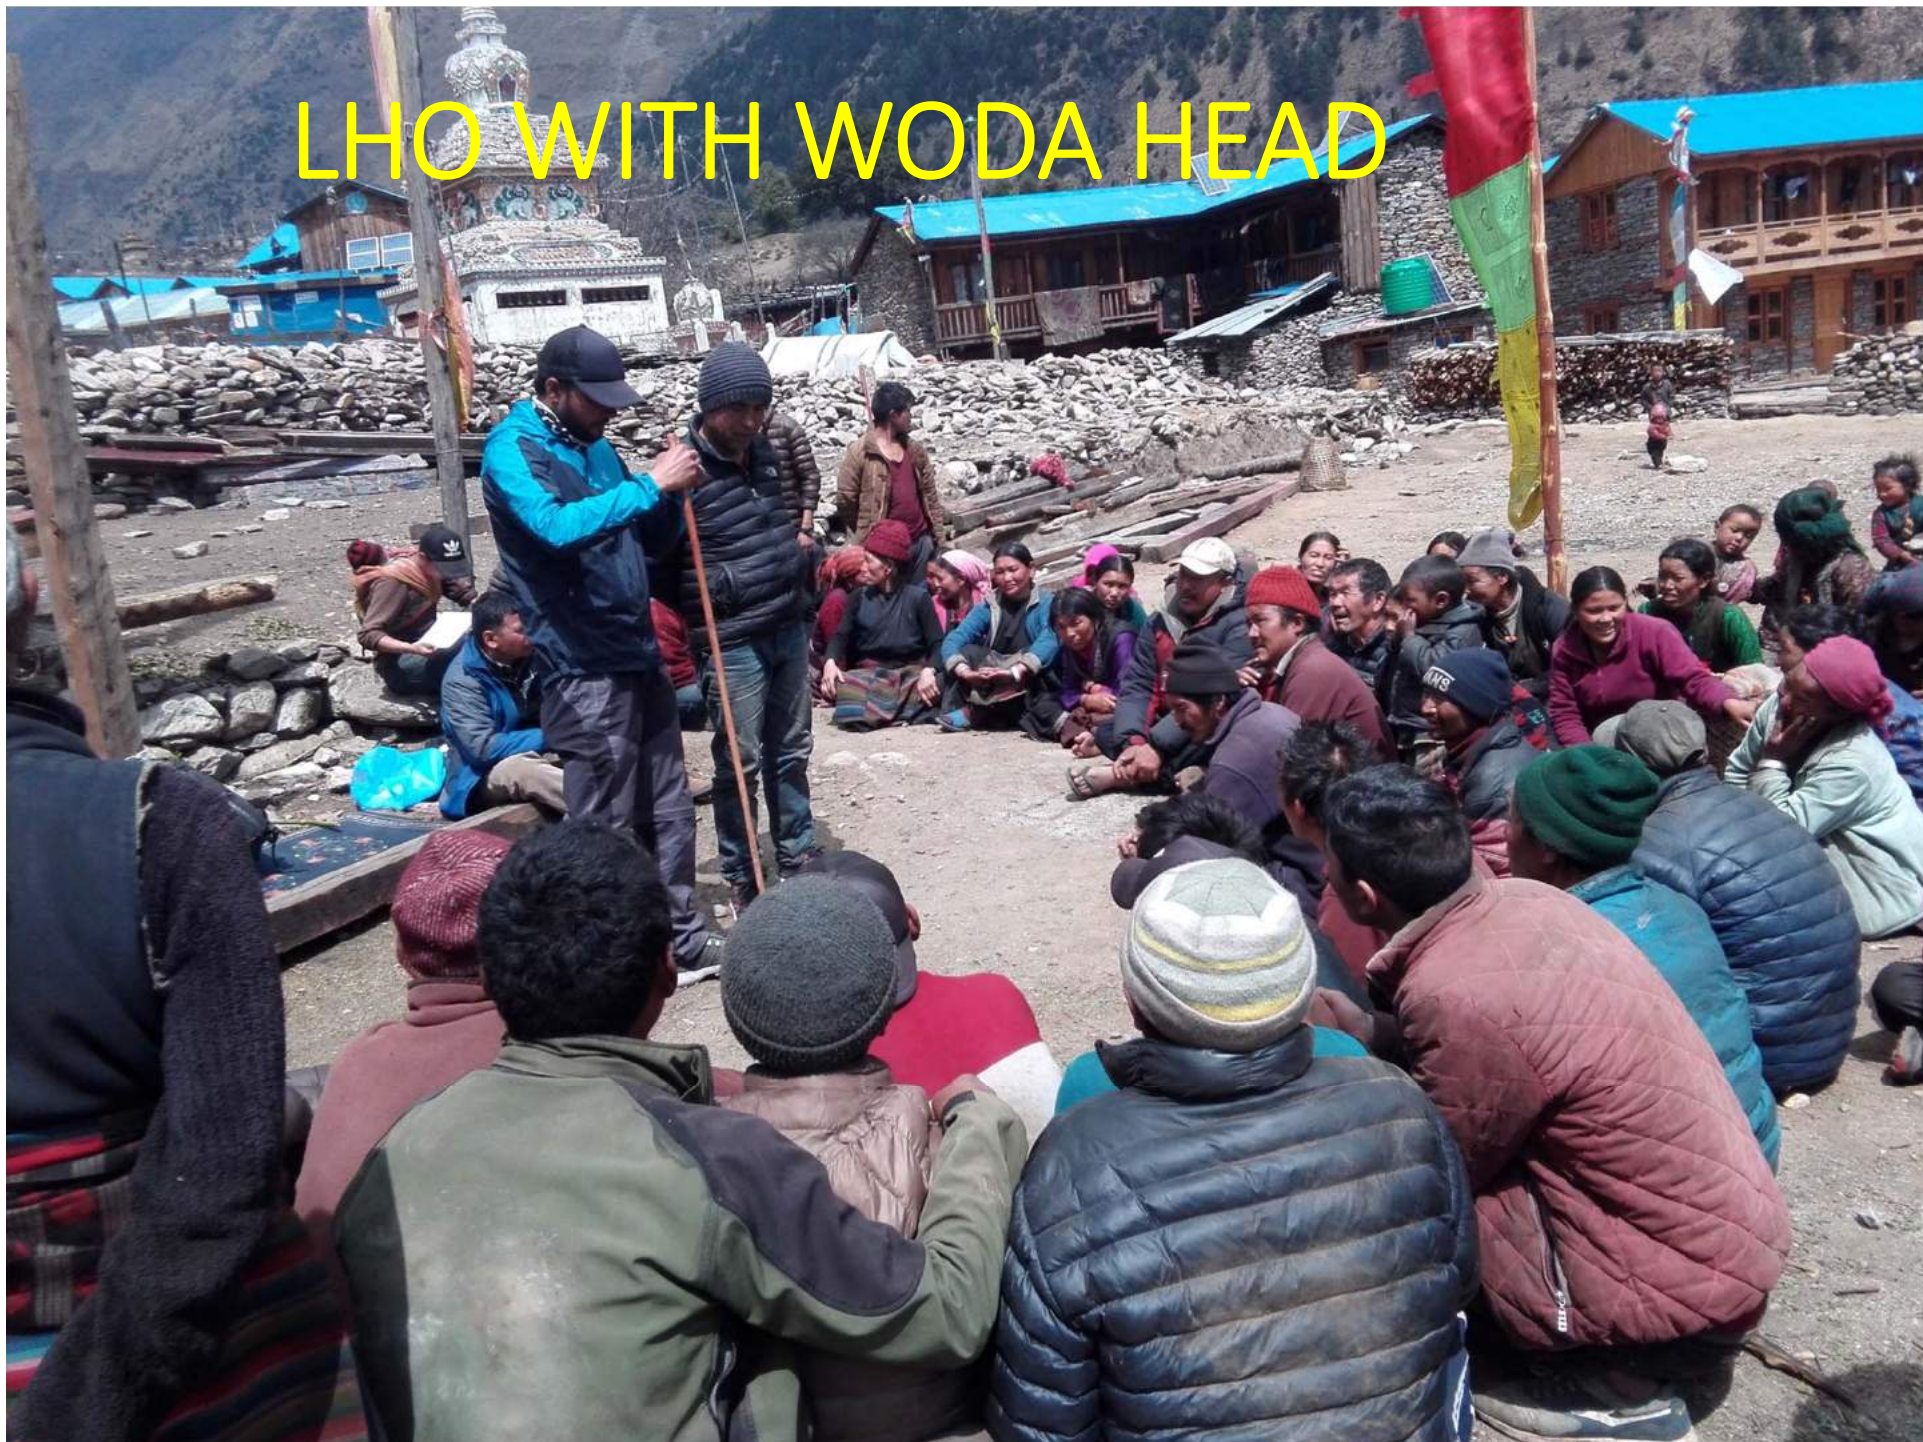

PROK(GAAP)

LHO(LHEE)

LHO WITH WODA HEAD

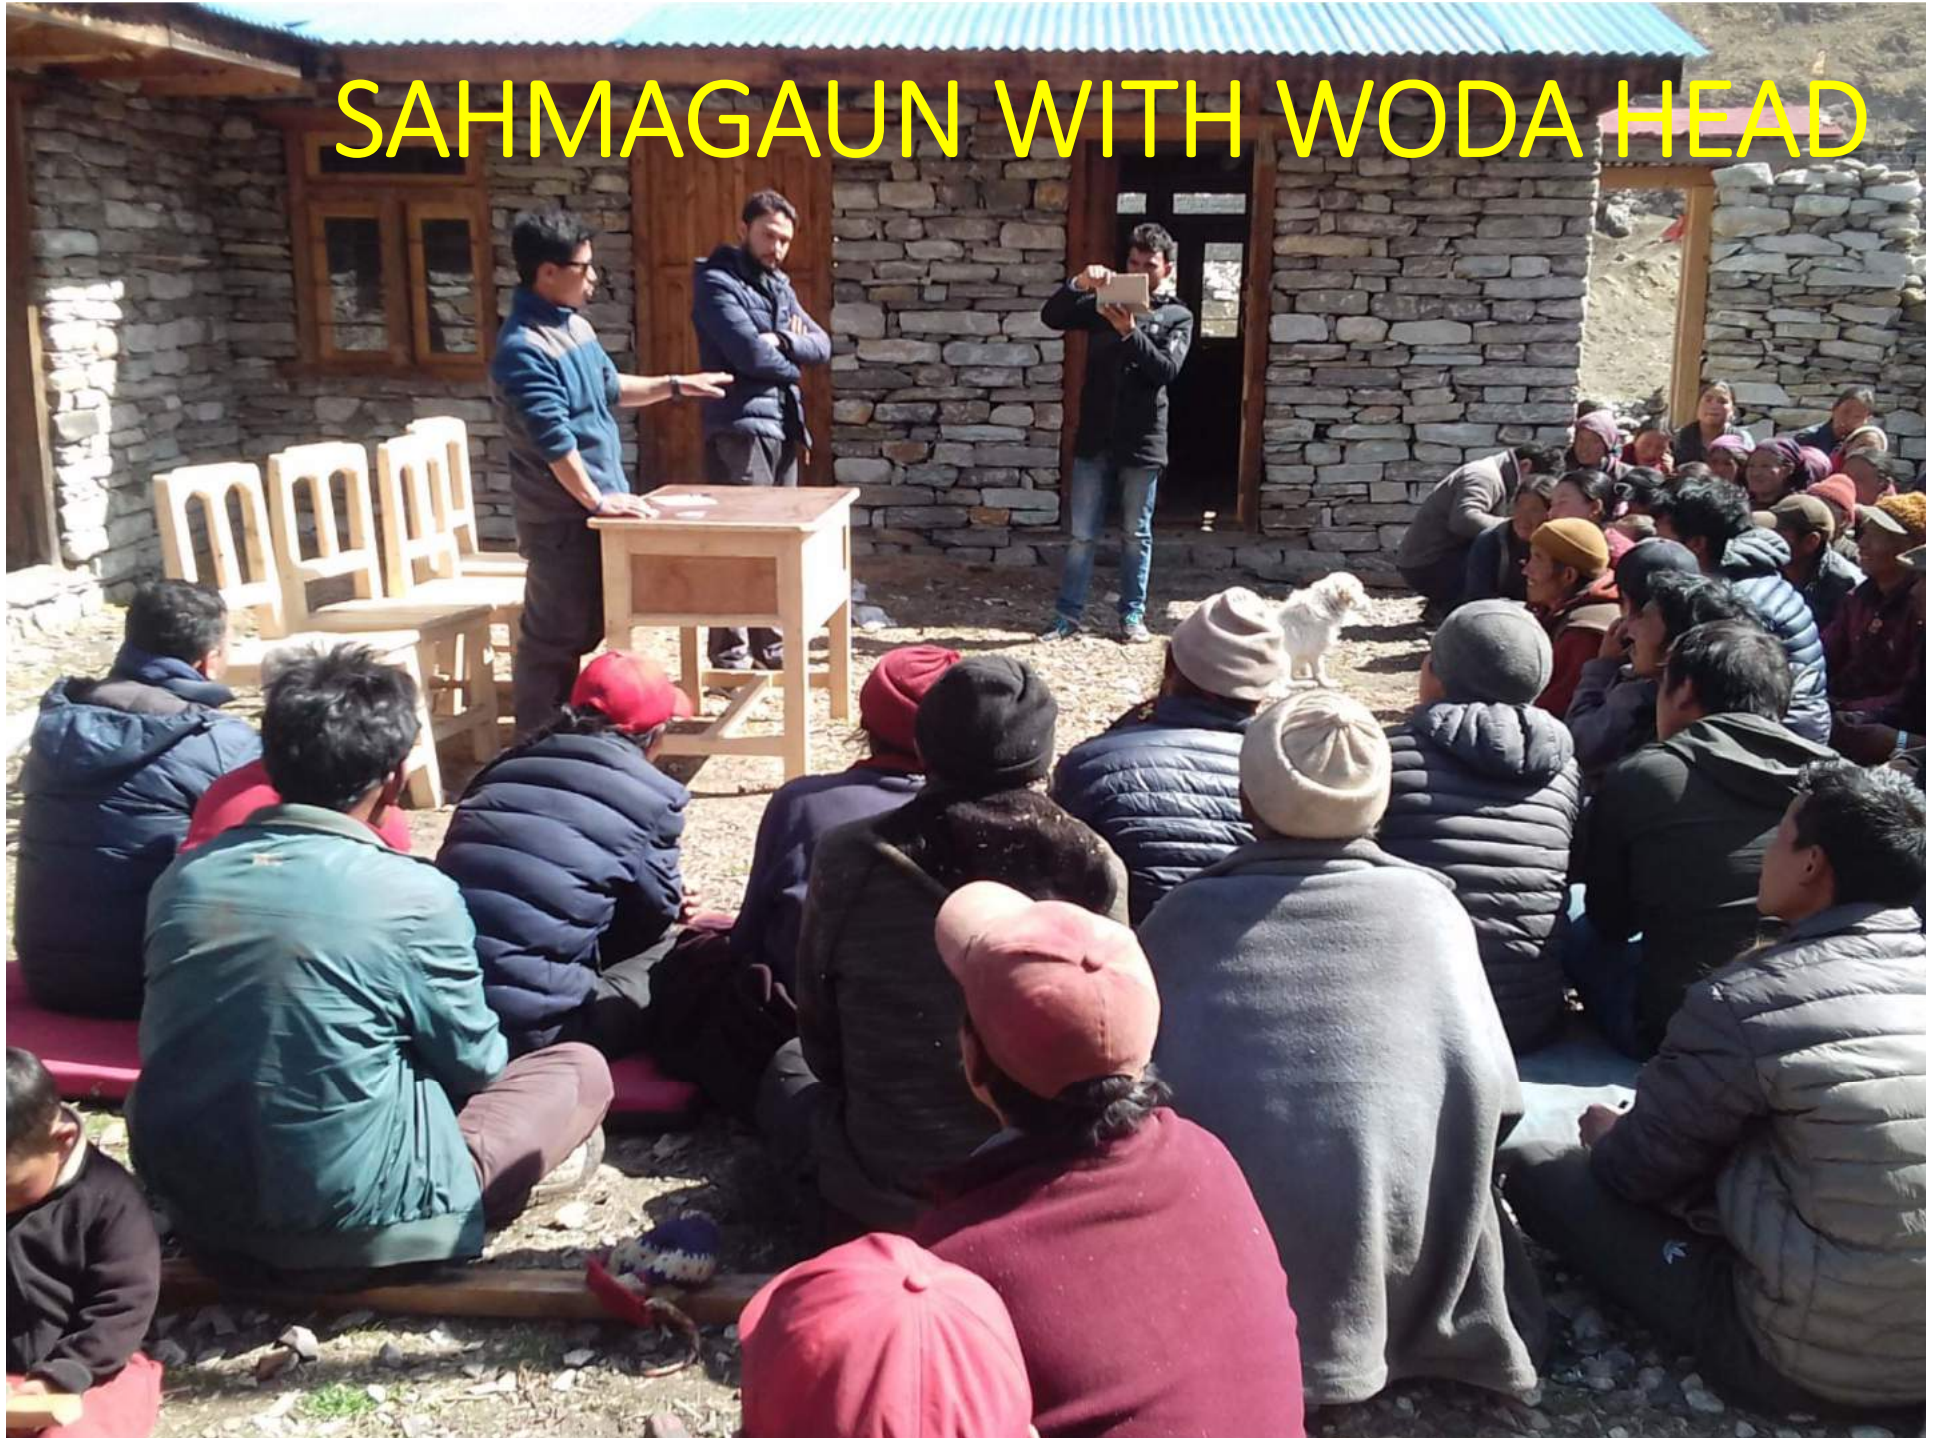

LHO(SHYALLA)

A photograph showing two men in a mountainous, high-altitude environment. On the left, a man with a beard and dark hair, wearing a dark blue quilted jacket, is pointing his right hand towards a stone wall. The wall is constructed from large, irregular grey stones with a horizontal band of reddish-brown wooden planks. To the right, another man with dark hair and a mustache, wearing a dark green quilted jacket, is looking at the wall. The background features steep, rocky mountains under a clear sky. The ground is covered with loose stones and debris.

What the people of Tsumnubri want with Government of Nepal?

- ✓ The date for 2nd tranche should be postponed for more than one year.
- ✓ The tranches amount should be increased for such highly remote areas.
- ✓ Tranches should be distributed by local bank.(Kumari bank has just started its branch in Sridibas).

THANK YOU
