

Nepal Flood and Landslide Response: Kailali & Kanchanpur

Situation Report #02

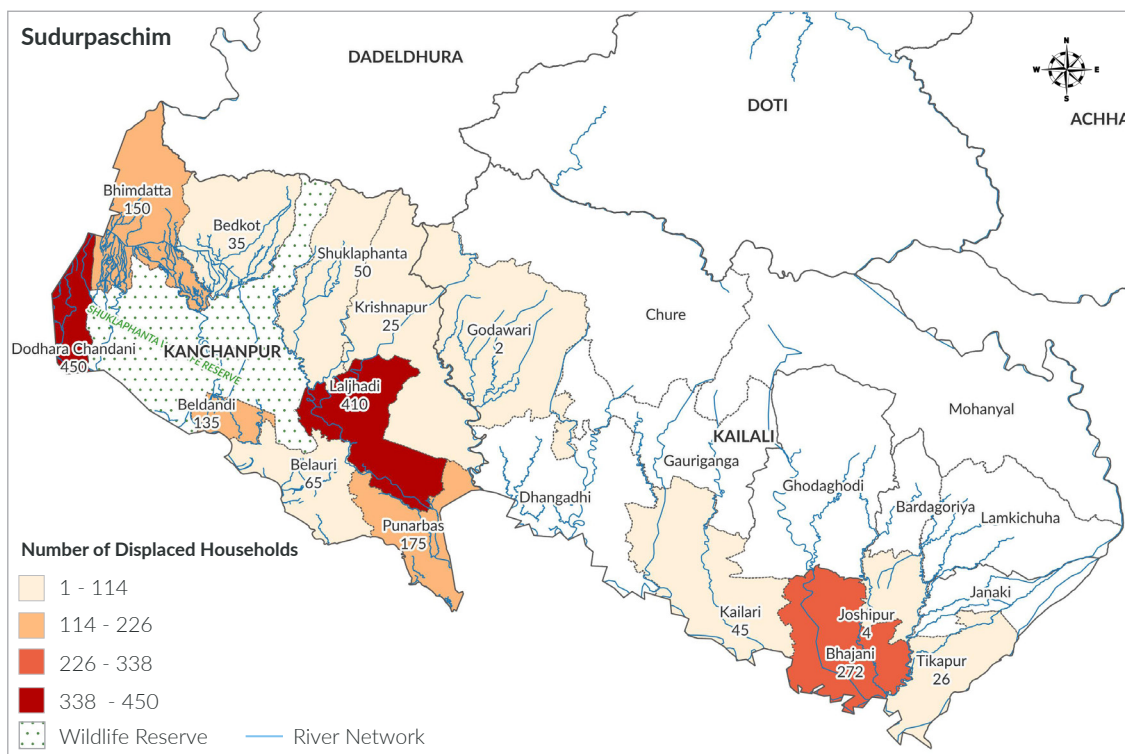

(as of 10 July 2024)

This report is produced by National Disaster Risk Reduction and Management Authority (NDRRMA) in collaboration with partners. It covers the situation of the monsoon affected.

Highlights

1. **Cloud burst** at Dodhara Chandani resulting heavy damage.
2. Highest rainfall of **624mm** in 24 hours till date in the history of Nepal at Dodhara, Kanchanpur.
3. **6,322** households affected and **1,812** households displaced.

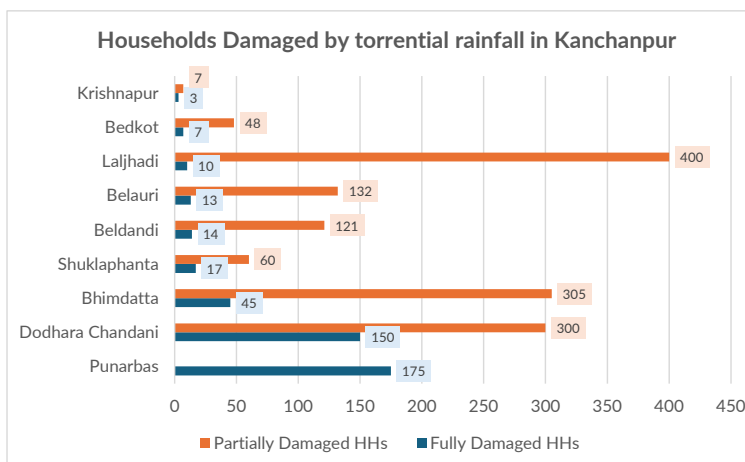

Situation Overview

Continuous rainfall from July 3, 2024, led to severe flooding, inundations, landslides, and thunderbolts across the country, particularly impacting Sudurpaschim Province. Kailali and Kanchanpur districts were heavily affected, with floods and inundations persisting for over 24 hours.

Casualties and Displacement: In Kanchanpur, five deaths were reported, and approximately 6,322 households were affected, displacing 1,812 households. Various settlements in both districts faced severe inundation, causing significant displacement.

Infrastructure Damage: The East-West Highway was critically impacted, with a culvert in Suda, Bedkot Municipality, washed away, disrupting travel and access. The Banbasa Bridge at Sharada Barrage was closed to four-wheelers for three consecutive days due to the dangerous rise in the Mahakali River, which recorded a flow of 255,000 cubic feet per second following a cloudburst in Dodhara Chandani, where 624 mm of rainfall was recorded within 24 hours—the highest in the country during this period.

Affected Areas: Several municipalities, including Dodhara Chandani, Bhimdatta, Bedkot, Beldandi, Belaury, Laljhadi, Shuklaphanta, Punarbas, Kailari, and Bhajani,

experienced severe flooding and displacement. Local authorities reported extensive damage to houses and structures, leading to significant financial losses.

Agricultural Loss and Damage: A total of 10 hectares of paddy fields have been lost in Chadani Dodhara Municipality. The loss of paddy fields represents a substantial financial setback for local farmers and the community, exacerbating the economic strain caused by the natural disaster. The damage to crops not only affects immediate food security but also has long-term implications for the agricultural productivity of the region.

Response and Preparedness: Despite ongoing rescue and relief efforts, the disaster's scale underscores the urgent need for improved flood-resilient infrastructure and enhanced disaster preparedness to mitigate the impact of future natural calamities.

Provincial Disaster Management Council decisions:

1. The Ministry of Internal Affairs and Law, in coordination with the District Disaster Management Committees, will address shelter and non-food item needs for the affected population.
2. Families who lost members to be provided with relief packages per the Provincial Disaster Management and Relief Distribution Guideline, 2076, in collaboration with DDMC.
3. Relief packages to be distributed to affected families in collaboration with all government levels and development partners.
4. Provincial Health ministries to deploy health technical staff to the affected areas.
