

URBAN RECONSTRUCTION TECHNICAL WORKING GROUP (UR-TWG)

Session 3

28th November 2019, HRRP Office, Lalitpur

15:00-17:00

AGENDA

- 1) Finalizing the urban issues to work on
- 2) Qualitative methodology review
- 3) Qualitative methodology detailing and responsibilities
- 4) UR-TWG Way forward and distribution of responsibilities

ATTENDEES

Lumanti, CRS, NSET, DRCN, Maggie Stephenson, and HRRP

KEY POINTS

Prioritizing issues based on the [results of the prioritization survey](#) conducted within the UR-TWG

At the meeting we looked at the highest weightage of issues in each category. The most prioritized issue within each category is listed below:

LAND	No Land ownership documents/small parcel
TECHNICAL	Compromised structural safety
RETROFITTING	Confusion between retrofit and repair
HERITAGE HOUSING	Higher cost of construction
FINANCE	None/little access to loans
Vulnerable Groups	NRA's criteria for vulnerability is limited
STA	No separate STA for urban recovery
Communication	Awareness on safe building practices
Governance	Coordination between NRA and municipalities
Policy	Insufficient policies for most vulnerable

- Then the WG collectively decided to focus on 4 categories out of the above list. The prioritized issues are:
Land
Finance
Socio-technical Assistance (STA)
Policy
- The working group will first focus on these issues and approach the other topics later on.

Qualitative study:

- DRCN is carrying out a qualitative study in 4 districts in 8 local units and 16 wards. Three out of 8 will be urban municipalities.
- The Qualitative study should not only be at the ward level but also at the municipal level
- Maggie: Detail out: profiling of who you will be speaking to and where
- Lumanti: Include gender as a cross-cutting issue throughout
- Maggie: Include questions on mobilizing resources. How are they accessing resources? What are they spending the first tranche money for?

- NSET: find out their aspirations for their reconstructed home
- Maggie: What other loans have they taken out? Some people have damaged houses but do not intend to rebuild. Take this into consideration. Find out about issues of finance and technical assistance in more detail.
Assess the ward-level capacity. What are their own requests for increasing their capacity?
- For the guthi data, DRCN can get anecdotal stories from guthis in Gorkha

Steps forward

- This week trying to identify which member organization can take up which ward for the qualitative study. HRRP to call member groups and discuss
- HRRP to refine the qualitative study
- Members to communicate details on their capacity to take up data collection in the wards where they work

Housing Recovery and Reconstruction Platform(HRRP)
UR-Technical Working Group Meeting

Date: 28 November, 2019

Venue: HRRP Office, Jwagal, Lalitpur
